## Major Impact Traffic Incidents and Mitigation

09/11/2020 (Friday)

- **Time:** 12:16 AM – 05:52 AM \*\*\*Non-Fatal\*\*\*
- **Location:** St. Louis City–Eastbound I-64 on ramp from I-44 Eastbound
- **Event Type:** One Vehicle Accident
- **Estimated Initial Impact:** Non-Rush Hour: 2 of 2 lanes affected equals (=) 100%
- **Incident Details:** Overturned tractor-trailer hauling thirty thousand (30,000) pounds of lemons with one (1) human injury. Scene was closed for cleanup.
- **Action Taken:** The TMC operator received a radio call from MoDOT Emergency Response of the incident, operator confirmed the closure on CCTV and notified additional MoDOT Emergency Response, to assist with traffic control. TMC Operators entered the event into ATMS, TMS and activated appropriate DMS boards. An incident alert, update, and clearance were sent out to the appropriate email groups. IDOT was contacted and advised of the incident. All lanes were closed, traffic was diverted back onto I-44 Eastbound.  
St. Louis City Fire and EMS were all on the scene as well as a one (1) tow for the vehicle. Department of Natural Resources (DNR) team responded and conducted their investigation and cleanup. There was no measurable queue viewed for Eastbound and all traffic returned to normal after the incident cleared. Extended duration was due to uplifting the vehicle and DNR clean up, there was no state damage.
- **Event Duration:** 05 hours 36 minutes

## Major Impact Traffic Incidents and Mitigation

10/01/2020 (Thursday)

- **Time:** 03:54 PM – 05:07 PM \*\*\* Fatal \*\*\*
- **Location:** Cool Valley, St. Louis County – Eastbound I-70 past Florissant RD
- **Event Type:** One vehicle accident
- **Estimated Initial Impact:** Rush Hour: 3 of 3 travel lanes affected equals (=) 100%
- **Incident Details:** The TMC operators heard radio traffic concerning a passenger car overturning multiple times with ejection. The TMC dispatched MoDOT ER to the scene.
- **Action Taken:** North County Cooperative (PD) were on scene with all lanes closed at 15:54. Northeast Fire Department and Northeast EMS arrived on scene at 15:55 and transported the patient. Two ER units arrived on scene at 15:54 and provided traffic control clearing the queue and redirecting traffic onto the Bermuda exit. An additional ER unit arrived to assist with advanced warning at 15:58. MSHP arrived on scene at 16:22. Tow arrived on scene at 16:31. Confirmation of the fatality came at 16:38. The two Left lanes opened at 16:53 and the remaining third lane opened at 17:07. Communications Staff, Motor Carriers, and the MoDOT Incident Management Coordinator were all notified. The TMC messaged for the event and entered it into TMS to notify the public of the closure. Incident, update and cleared alerts were used to advise management of the closure. Traffic queued approximately 2.2 miles but returned to normal approximately 17 minutes after all lanes were opened. There was no notification as to when a reconstruction investigation would take place.

## Major Impact Traffic Incidents and Mitigation

10/30/2020 (Friday)

- **Time:** 10:13 PM – 04:25 AM \*\*\*Non-Fatal\*\*\*
- **Location:** Franklin County, Mo. I-44 WB past MO 100
- **Event Type:** Two Vehicle Accident
- **Estimated Initial Impact:** Non-Rush Hour: 2 of 2 lanes affected equals (=) 100%
- **Incident Details:** Tractor-trailer was hauling 39,000 lbs. of frozen beef patties
- **Action Taken:** TMC operators overheard Troop C being dispatched to an accident. The Operators started pulling cameras to confirm this incident and entering it into the system to get the public notified. The TMC Operator notified the MODOT Emergency Response for that I-44 area to assist with traffic control. Once the event was entered into TMS the proper DMS boards were activated and additional boards were added. Highway Patrol was the first responders on scene, this is when we were able to start seeing the backup on camera where all lanes were closed. Traffic was diverted off the highway onto MO 100. Emergency Response was too far from the scene to be able to give live updates. Highway Patrol and Heavy Tow was able to get the right lane of traffic opened to relieve the queue that had built up to 3 miles, once the right lane opened traffic was relieved quickly. The health department was contacted by Highway Patrol to see if they would be performing the investigation on the interstate or at the tow yard. No addition information was shared to MODOT on behalf of the health department. Shortly after two additional heavy tows arrived on scene to assist with cleanup, they were able to get the Tractor trailer unloaded of the 39,000 lbs. of frozen beef patties, and shortly after tractor trailer was up righted. Highway Patrol did report that there was 400 ft of guard cable that was damaged. All departments that were on scene kept open communication, allowing us to get traffic moving at a reasonable time. Other than the communication on the process of what the Health Department's plans were, I think we all worked well as a full unit.

## Major Impact Traffic Incidents and Mitigation

10/31/2020 (Saturday)

- **Time:** 10:26 PM – 04:17 AM \*\*\*Non-Fatal\*\*\*
- **Location:** Hazelwood, Mo. I-270 WB past I-170
- **Event Type:** Debris/Roadway Failing
- **Estimated Initial Impact:** Non-Rush Hour: 1 of 3 lanes affected
- **Incident Details:** Roadway was Falling through
- **Action Taken:** MODOT's Operator took a phone call from Hazelwood Police Dispatch stating there was reports of a boulder in the number one lane of traffic, causing flat tires. MODOT's operator was pulling cameras up and entering the event into TMS while notifying Emergency Response. Once Hazelwood Police was on scene the TMC overheard on the radio traffic that the ground was failing, and you can see water underneath. Emergency Response arrived on the scene sending the photos of the roadway to Gatewayguide@modot.mo.gov. This is when The TMC staff started making phone calls to the Bridge Superintendent and Construction Deputy Project Director. The Bridge Crew Engineer made it to scene, this is when we shut the ramp from I-170 NB to I-270 WB down to slow traffic. Once the Bridge Crew Engineer checked the bridge over, he advised that we will be shutting down lanes one and two until the repair has been complete. At this point Tramar Traffic was contacted to setup lane drops where the work was going to be performed. While enroute to the scene the Crash truck was struck on the EB side of the highway, causing an extended duration. Once Tramar Traffic was able to get to the scene they able to setup the lane drops and we were able to get the event turned into a workzone.
